Allowable Subject Matter

1. Claims 1-25 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

With respect to claim 1, no prior art of record teaches a primary cache and at least two caches, wherein the primary cache is resized by a cache tuner, based upon the performance of the test caches. The closest prior art reference of Lahiri teaches simulating caches of certain sizes but does not teach a test cache that is actually a different size.

With respect to claims 6 and 16, no prior art of record teaches managing both an active cache and a test cache by inserting and evicting caching keys, wherein the active cache received cached objects for retrieval by reference to the corresponding key, and the test cache receives dummy placeholders, wherein the active cache is resized based on the hits in the active and test caches. The closest prior art reference of Lahiri fails to teach inserting both caching keys and dummy placeholders in the test cache.

With respect to claim 11 and 21, no prior art of record teaches receiving a request to retrieve an object, generating a cache key for the object, searching an active cache and a test cache for the object, returning the object from the active cache if the object is located in the active cache, updating hit rate statistics for the active cache and determining whether to resize the active cache based on the statistics.
